Cabinet Secretary

BRUCE YURDIN  
Acting Deputy Secretary

November 16, 2018

### **Re: Groundwater Discharge Permits Proposed for Approval**

The New Mexico Environment Department (NMED) Ground Water Quality Bureau (GWQB) hereby provides notice pursuant to 20.6.2.3108.H NMAC that the following Groundwater Discharge Permits have been proposed for approval. Prior to ruling, NMED will allow thirty days after the date of publication of this notice during which time written comments may be submitted and a public hearing may be requested. Requests for public hearing shall be in writing and shall set forth the reasons why a hearing should be held. A hearing will be held if NMED determines that there is substantial public interest.

NMED encourages the public to learn about and be involved in regulatory decision-making opportunities. For each proposed permitted activity, NMED maintains a Public Involvement Plan (PIP) to identify all communities potentially affected by the proposed permitting activity and expand public participation opportunities to accommodate the needs of those communities. Additionally, NMED maintains a facility specific mailing list for persons who wish to receive future notices.

To request additional information, to be placed on a facility specific mailing list, to obtain a copy of a draft permit or associated PIP, or to submit a comment or a request for hearing, contact the GWQB at PO Box 5469, Santa Fe, NM 87502-5469, (505) 827-2900. Telephone conversation assistance is available through Relay New Mexico at no charge for people who are deaf, hard of hearing, or have difficulty speaking on the phone, by calling 1-800-659-1779; TTY users: 1-800-659-8331; Spanish: 1-800-327-1857. Additionally, draft permits may be viewed on-line at <https://www.env.nm.gov/gwqb/public-notice/> and associated PIPs may be viewed on-line at <https://www.env.nm.gov/gwqb/public-involvement-plans/> or at the NMED field office nearest to the proposed permitted activity.

NMED does not discriminate on the basis of race, color, national origin, disability, age or sex in the administration of its programs or activities, as required by applicable laws and regulations. NMED is responsible for coordination of compliance efforts and receipt of inquiries concerning non-discrimination requirements implemented by 40 C.F.R. Parts 5 and 7, including Title VI of the Civil Rights Act of 1964, as amended; Section 504 of the Rehabilitation Act of 1973; the Age Discrimination Act of 1975, Title IX of the Education Amendments of 1972, and Section 13 of the Federal Water Pollution Control Act Amendments of 1972. If you have any questions about this notice or any of NMED's non-discrimination programs, policies or procedures, you may contact: Kristine Pintado, Non-Discrimination Coordinator, New Mexico Environment Department, 1190 St. Francis Dr., Suite N4050, P.O. Box 5469, Santa Fe, NM 87502, (505) 827-2855, [nd.coordinator@state.nm.us](mailto:nd.coordinator@state.nm.us). If you believe that you have been discriminated against with respect to a NMED program or activity, you may contact the Non-Discrimination Coordinator identified above or visit our website at <https://www.env.nm.gov/non-employee-discrimination-complaint-page/> to learn how and where to file a complaint of discrimination.

Sincerely,

Lochlin Farrell  
Ground Water Quality Bureau

**Notice:** DP-166, Freeport-McMoRan Tyrone Mine: Freeport-McMoRan Tyrone Inc. proposes to renew and modify the Discharge Permit for the discharge of up to 49,000,000 gallons per day (gpd) of acidic leach solution (raffinate) on copper ore stockpiles at an open pit mine. The modification includes construction of a

**[Notice continued on next page]**

new leach stockpile in the main pit of the Tyrone Mine, an increase in the maximum daily discharge of raffinate from 40,000,000 gpd to 49,000,000 gpd and using the main pit for collection of pregnant leach solution (PLS). Potential contaminants from this type of discharge include sulfate, total dissolved solids, and metals. The facility is located at Highway 90 South, Tyrone Mine Rd, approximately 4.5 miles southwest of Tyrone, in Sections 14, 15, 21, 22, 23, 26, 27, and 28, T19S, R15W, Grant County. Groundwater most likely to be affected is at a depth ranging from approximately ground surface to 350 feet below ground surface and had a pre-discharge total dissolved solids concentration ranging from approximately 100 to 500 milligrams per liter.
